

Fellowship in General Dentistry

Fellowship in General Dentistry is an exclusive Fellowship programme conducted at **Balaji Superspeciality Clinic** which enables a Dentist to begin their dental career with confidence & enriches the practicing dentist in their clinical skills.

Programme Highlights:

- This Fellowship Program includes **all the content of Fellowship in Clinical Endodontics** , apart from the following added content .
- It is a **3months clinical programme** which runs **daily from 10am to 5 pm** except Sunday
- It is the amalgamation of multi-department works to a single chair uni-dentist expertise.
- Enables a Dentist to treat almost all aspects of Dentistry except Orthodontics, Implants, FMR & few major surgical procedures.
- Gives an edge to a young dentist to begin their own dental practice
- Alongwith dental treatment skills it gives an opportunity to the participant to build-up practice management skills as well .
- **Programme content:**
 - Initial 3-4 days of course contains lectures on **basic & rotary endodontics** alongwith Hands-on practice on extracted teeth
 - Once the participant is confident to open access cavity preparations, patients are allotted (A minimum of **25 root canals on patients** / participant provided)
 - Each participant will learn crown preparations on extracted teeth first & then allowed to do the **same on 15 patients.**

- Each fellow is allowed to work on patients for
 - extraction-30**
 - lasers-10**
 - hand files-2**
 - hand protaper-5**
 - rotary- 5**
 - apisectomy-1**
 - hemisection/bicuspidisation-1**
 - post(metal/fibre)-5**
 - core build up- composite -10 , gic-10**
-
- Use Elastomeric impression material in cases where you need to record finer details
- Learn **atraumatic extractions** on patients
- All participants of this programme are free to do the **composite fillings** or any other fillings in the daily O.P. of our attached charity hospital
- Manage prosthetic replacement for difficult crowns by learning **post & core build-up** in patients

Apart from above procedures the participants depending upon their confidence & enthusiasm can convince patients & perform following advanced treatments:

- Learn & do the retraction of gingiva by using retraction gel & gingival retraction cord in anterior cases
- Use **Elastomeric impression** material in cases where you need to record finer details
- Shall have the opportunity to learn placing **tooth Jewels**
